

## Secure Connection Services

---

Encrypted Connection for work from home employees to safely use your network. With the onset of the COVID-19, stay at home requirements that companies are facing is resulting in a difficult time getting their users ramped up to work from home. JK Seva has over 20 years of remote work and hosting. We have set up some of our systems to support clients with the challenges involved in providing secure access to their local internet quickly and securely.

Our networks and data centers all meet or exceed HIPAA standards and are audited annually. We only use state of the art firewall components and we have professionals to assist getting your users connected to your office.

- HIPAA compliant technology.
- Live US based 24 hour support 7 days a week.
- Easy to use VPN client.
- Fast secure connection.
- Set up in 4 hours or less.

JK Seva can support your transition from purely transactional into one that operates at the best-practices level, provides comprehensive workforce management capabilities, and delivers a true advantage. First and foremost, we are a software consulting firm with an experienced, dedicated technical team striving to provide the most efficient service possible. We specialize in upgrades, implementations, training, custom solutions and software development.
