

Managed Services

JK Seva is a software solutions firm that gets excited about unique projects, businesses and the passionate people behind them. Increase end user efficiency with Infor certified service desk support. We are available to answer your questions and resolve your problems.

Your company can reduce the administrative weight of managing increasingly complex human resource, financial and procurement applications, freeing your valued employees to focus more on the company's strategies to drive innovation. We are here to receive, assign, track, report and resolve your incidents and service requests 24/7, 365 days a year and help you stay current with your Infor patches, fixes, regulatory and compliance updates and new releases with proactive change management.

If you are not ready to go to the cloud, JK Seva's hosting is an alternative solution. If you are going to the cloud and want to free up your resources, instead of paying a 3rd party consultant for technical support, we can help you with your managed services. You can reduce your total cost of ownership (TCO) and save your cash flow and achieve foreseeable costs by redirecting expenses associated with maintenance.

JK Seva focuses on helping clients with upgrades, implementations, training, custom solutions and software development. They often partner with other clients to add value to their ERP solution in the areas of Financial Reporting, Document Management, add-on HCM solutions and Reporting, EDI services and many more.
